

HSBC MSCI Malaysia UCITS ETF

Fund Overview

March 2021

The strategy at a glance

The HSBC MSCI Malaysia UCITS ETF aims to replicate the performance of the MSCI Malaysia Index, while focusing on minimising the tracking difference between the fund and the index. This is done through an easy and cost-efficient approach harnessing HSBC's expertise in passive investing.

About the Index

The MSCI Malaysia provides direct access to large and mid cap companies, representing about 85% of the Malaysian equity universe.

Dividend Yield	2.81%
No. of constituents	38

Source: MSCI, as at end of January 2021.

Cost efficiency in practice

- ◆ As we recognise that the macroeconomic conditions are in place for emerging markets to thrive, in March 2021, we reduced the cost of our HSBC MSCI Malaysia UCITS ETF to 0.50%
- ◆ Our ETF is amongst the cheapest in the market that offers exposure to Malaysian equities

The strength of our ETF

-  **Competitive pricing:** Our physically replicated ETF offers cost efficient access to Malaysian equities (TER of 0.50%)
-  **Dedicated teams:** Our approach leverages our global equity dealing team, ensuring on-the-ground expertise and insights
-  **Long track record:** Strong track record of close tracking and minimising costs
-  **Proprietary resources:** Robust in-house systems, including proprietary portfolio modelling and risk analytics, designed to support efficient investment processes and aim for superior tracking
-  **Enhanced valuations:** Deconstructed alongside the index each day by price, income and corporate action, ensuring we do not miss out on any entitlement that the fund is due
-  **Emerging market expertise:** Leverages HSBC's strong on-the-ground presence in key developing markets, offering unparalleled local access and insight

The performance figures displayed in the document relate to the past and past performance should not be seen as an indication of future returns.

Key risks

The value of an investment in the portfolios and any income from them can go down as well as up and as with any investment you may not receive back the amount originally invested.

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- ◆ **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

The rating is based on price volatility over the last five years, and is an indicator of absolute risk. Historical data may not be a reliable indication for the future. The rating is not guaranteed to remain unchanged and the categorisation may shift over time. The lowest rating does not mean a risk-free investment. Do not run any unnecessary risk. Read the Key Investor Information Document. The fund invests in instruments of high level of volatility. The value of investments can go up as well as down.

Important information

Capital is not guaranteed. Those ETF must be considered as speculative

The HSBC ETFs are sub-funds of HSBC ETFs plc ("the Company"), an investment company with variable capital and segregated liability between sub-funds, incorporated in Ireland as a public limited company, and is authorised by the Central Bank of Ireland. The company is constituted as an umbrella fund, with segregated liability between sub-funds. Shares purchased on the secondary market cannot usually be sold directly back to the Company. Investors must buy and sell shares on the secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current Net Asset Value per share when buying shares and may receive less than the current Net Asset Value per Share when selling them.
